## AMT Math Challenge Week

# AMT =

### 4 Classic Events+6<sup>+</sup> Interesting Math Challenges

AMT math challenge, which is an online interaction between the AMT directors and all participating students to experience the charm of math and share the fun of learning math.

### Math Challenge Examples

#### Countdown

Select 2 players from different teams. Let them see the question at the same time, whoever answers correctly first stays. Then choose the next player to match with the player who stays in the last round. And so on. All players can watch and experience the speed of the math competition.

#### Guts Round Trial

This challenge is a warm up for Guts round. By doing the questions and ranking in real time, see the rate of the correct answerer, and the speed of answering the questions. After finishing a set of questions, immediately start the next set of questions. Experience the collision of speed and wisdom.

#### Integration bee

This challenge is for those who have already studied calculus, or who are interested in calculus. Students can discuss with other teammates who also like calculus.

#### Game Theory

The chairman will lead the students to understand the classic examples through various scenes, such as: some people in a circle, numbered as 1, 2, 3, ..., N, starting from the 1st, the person who reports m will quit, the next person will report from 1, when reporting m, the person who reports m will quit, the next person will report from 1, when reporting m, the person who reports m will quit, and the next person will report from 1, when reporting m, the person who reports m will quit. If you go through this cycle, what's the number of the last person left?

#### Estimation

Through the common sense or knowledge mastered, one can use the mathematical principles in life to estimate the values. In this challenge, team members not only pay attention to the math itself, but also increase the mutual communication between the teams.
